

ACRÓNIMOS, ABREVIATURAS Y SIGLAS EN INGLÉS MÁS USADAS EN INTERNET

La siguiente lista recoge las siglas y acrónimos de uso más generalizado en Internet (emails informales, chats, foros, etc.) o en comunicación por texto (sms) y principalmente en redes sociales como Twitter, Facebook, etc. o programas de mensajería como Whatsapp, Telegram, etc.

Aunque su empleo en un lenguaje formal no es correcto, su uso está muy extendido ya que permiten reducir el texto con lo que se gana en contenido permitiendo mensajes más cortos. Asimismo, al igual que los emoticonos, transmiten muchos de ellos un estado de ánimo o una mayor expresividad que el lenguaje tradicional.

En inglés el uso de estos acrónimos y siglas a modo de slang (lenguaje coloquial) está muy extendido y de ahí la importancia de conocer el significado de los términos más comunes. Existen muchos más que harían la lista interminable, por lo que hemos preferido ofrecerte los de uso más habitual junto con su significado. La lista está ordenada alfabéticamente.
